Filled and Non-filled Synthetic Football Surfacing

Revolutionary synthetic field surfaces. Available only from AstroTurf, L.L.C. and ASI, the world leaders in quality sports surfacing. For over forty years, AstroTurf® has led the way with consistency, dependability and innovation.

AstroTurf's renewed focus is not on protecting innovation, but rather innovating protection. We are The New Generation of Sports Surfacing. Around the globe, someone, somewhere is giving their all on an AstroTurf® surface right now.

Featuring the best combination of:

- EcoCool Infill
- Shock Absorption
- Playability
- Durability
- Protection
- Polyurethane Backing

AstroTurf, LLC
2680 Lakeland Road, S.E.
Dalton, Georgia 30721, USA

"The [AstroPlay®] surface has been very good for Manchester United. [...] Manchester United would not select a playing surface that did not meet the requirements of governing bodies."

George Johnstone, Group Manager for Manchester United

Playing by the Rules.

Keeping the Game Clean!™

AstroPlay®

- ▶ Ideal for multipurpose use
- ▶ Grass-like ball response
- ▶ Low abrasive index (suitable for slide tackles)
- ▶ Astroshield® antimicrobial technology in every fibre
- ▶ Rapid vertical drainage
- ▶ Excellent durability
- ▶ Resistant to UV sunlight, mould, mildew and environmental attack
- ▶ Uniform traction in all kinds of weather

Astroplay® — Even Better Than Natural Grass!

AstroTurf® football systems such as AstroPlay® N55, AstroPlay Z65X, AstroPlay Z and Puregrass™ balance performance and durability, while maintaining affordability for football clubs the world over. AstroTurf® football field systems look and play like real grass but performs better. In fact, our systems are stronger, more uniform, and more consistent than anything the competition – including mother nature – has to offer. All systems offer all-weather performance, safety and durability and meet the latest football standards for ball-to-surface and foot-to-surface interaction.

With a variety of options, we will be pleased to design a field to fit your specific needs.

ASTROPLAY® N55

Setting durability and performance standards in a polyethylene-based system.

Innovative manufacturing process that elongates and orients the XP fibres which enhances appearance. FIFA 1 star at University of Kent.

ASTROPLAY® Z65X

100% monofilament polyethylene system.

New X-Treme duo monofilament is the market leader meeting FIFA 2 star and IRB approval.

Astroplay Z65X has an 11mm or 22mm shock pad

ASTROPLAY® Z

Polyethylene fibre turf system that gets its natural appearance from individual monofilament blades.

Eliminates post-fibrillation of the fibre system which creates softer and more durable fibre.

Astroplay Z has passed FIFA 2 star, and contains no sand.

PUREGRASS™

The most durable system with its all-nylon, 4th generation monofilament turf.

Its superior engineering ensures uncompromised performance while improving traction and ball performance. No infill required.
